July 9, 2008

Dear OPRA Market Data Recipients:

The OPRA participants have furnished traffic projections for 2009/2010. These MPS projections are based on a 5 second interval. The projections for January 2009 have decreased from earlier projections because of quote mitigation efforts at individual Exchanges.

OPRA will increase the potential traffic rate from SIAC at the opening on the indicated date. The bandwidth required to receive data via your SFTI connection is also shown. The required bandwidth is for either version of FAST (FAST or FAST for Symbology). Two redundant streams of data are available from SIAC. These projections are for one stream.

	Required Capacity Messages Per Second (MPS)	Bandwidth Megabits Per Second (Mbps)	Bandwidth Plus 10% For Retransmissions	Total Messages Per Day
1/6/09	1,540,000	263.3	289.7	8.9 Billion
7/7/09	1,846,000	315.7	347.2	10.3 Billion
1/5/10	2,157,000	368.8	405.7	11.9 Billion

Very truly yours,

Joe Corrigan
Executive Director
