December 29, 2010

Dear OPRA Market Data Recipients:

As previously announced, the number of Equity/Index multicast lines on the OPRA system will increase from 24 to 48. Currently, all 48 lines are active. Lines 1-24 contain market data while lines 25-48 contain line integrity and administrative test messages. At the start of day March 7, 2011, all 48 lines will contain market data.

All multicast recipients are invited to participate in a final verification checkout with the new traffic distribution on Saturday, March 5th. Please note that if any multicast recipient experiences technical issues on that Saturday, that user must work throughout the weekend to resolve those issues.

The traffic distribution for the 48 line network is available in Appendix B of the SIAC Output Specifications at www.opradata.com.

Testing of the 48 line network will be available Monday through Friday evenings. To coordinate weekend testing or participation in the Saturday, March 5th final verification checkout, please register in the following way:

1. Email your name and number to CQS-CTS-OPRA@siac.com
2. Contact the SIAC Service Desk at 866-873-7422

Written or verbal confirmation of testing is required.

Very truly yours,

Joe Corrigan
Executive Director
