

November 19, 2009

To: OPRA Multicast Data Recipients

Subject: OPRA System Output Communications Network Source Addresses

Summary

SIAC is in the process of upgrading hardware at our disaster recovery location supporting the OPRA systems. The new hardware will be production ready in mid-December.

All Source IP and Multicast IP addresses will remain the same.

Testing

SIAC will be offering OPRA testing utilizing the new hardware on the following Saturdays:

- December 5, 2009 from 9:00 a.m. - 12:00 noon, ET
- December 12, 2009 from 2:00 p.m. - 5:00 p.m, ET (after completion of the OSI Industry Test)
- December 19, 2009 from 9:00 a.m. - 12:00 noon, ET

Multicast data recipients are encouraged to capture OPRA test data on these dates to verify the integrity of the Source IP and Multicast IP addresses, and ensure continued receipt of this data in production.

Documentation

All Source IP and Multicast IP address information can be obtained in the “National Market Systems Common IP Multicast Distribution Network Interface Specification”, Version 1.33 dated February 27, 2009, which may be accessed using the following link:

http://www.opradata.com/specs/common_ip_multicast_distribution.pdf

Test Registration:

Please register to test in one of the following ways:

1. Email your name, phone number, and test date(s) to CQS-CTS-OPRA@siac.com. Please submit any technical questions to this same email address.
2. Contact William Gutierrez at 212.383.4908 or Diane Mucha at 212.383.5411.

Test Result Confirmation:

Please email your test results to CQS-CTS-OPRA@siac.com.

Sincerely,

Michael Collazo
Director
NMS Product Planning & Management
