October 14, 2009

Dear OPRA Market Data Recipients:

Related to this past weekend's OSI testing, one of the NASDAQ OMX PHLX's applications still had a valid OSI setting embedded in its operations. As a result, on October 12, 2009, all disseminated quotes were sent with an invalid strike code. The problem was resolved by the PHLX at 9:40:52 a.m. eastern time on October 12, 2009.

NASDAQ OMX PHLX regrets any inconvenience this may have caused.

Very truly yours,

Joe Corrigan
Executive Director
