July 26, 2007

Dear OPRA Market Data Recipients:

At the present time, traffic is routed based on the first 2 characters of the security symbol to the appropriate output line. For example, Line 1 currently contains traffic for A to AT. Using only the first 2 characters does not allow enough precision and the lines are not being used efficiently.

SIAC will begin to use the 3 character security symbol to route traffic. For example, Line 2 might have traffic from AU to BNG. The specific line assignments will be announced in mid August. The change will be effective at the start of day September 17, 2007.

Very truly yours,

Joe Corrigan
Executive Director
