July 20, 2010

Dear OPRA Market Data Recipients:

The OPRA participants have updated their traffic projections for 2011 & 2012. These MPS projections are based on a 5 second interval. These projections include C2, CBOE's new Options Exchange, which is expected to start October 19, 2010

OPRA will increase the potential traffic rate from SIAC at the opening on the indicated date. The bandwidth required to receive data via your SFTI connection is reflected in Gigabits per second, and is based upon finer time interval measurements.

Two redundant streams of data are available from SIAC. These projections are for one stream.

	Required Capacity Messages Per Second (MPS)	Bandwidth Gigabits Per Second (Gbps)	Bandwidth Plus 10% For Retransmissions	Total Messages Per Day
1/11/11	4,069,000	0.97	1.07	15.5 Billion
*7/7/11	4,606,000	1.11	1.22	17.9 Billion
**January, 2012	5,067,000	1.22	1.34	20.7 Billion

*** - Rescheduled from July 12, 2011**

**** - Exact date to be determined**

Very truly yours,

Joe Corrigan
Executive Director
