January 14, 2010

Dear OPRA Market Data Recipients:

The OPRA participants have updated their traffic projections for 2010 & 2011. These MPS projections are based on a 5 second interval. Some of the projections are lower than before, better reflecting current business conditions. The projections reflect the projected start date for CBOE's new options Exchange and the BATS Options Exchange.

OPRA will increase the potential traffic rate from SIAC at the opening on the indicated date. The bandwidth required to receive data via your SFTI connection is also shown. Two redundant streams of data are available from SIAC. These projections are for one stream.

	Required Capacity Messages Per Second (MPS)	Bandwidth Megabits Per Second (Mbps)	Bandwidth Plus 10% For Retransmissions	Total Messages Per Day
7/13/10	3,450,000	590.0	648.9	10.3 Billion
1/11/11	4,011,000	685.9	754.5	11.8 Billion
7/12/11	4,468,000	764.0	840.4	13.0 Billion

Very truly yours,

Joe Corrigan
Executive Director
