June 6, 2008

Dear OPRA Market Data Recipients:

The FAST network is currently scheduled to terminate July 25, 2008. This date has been extended. The FAST network will now terminate at the end of day November 14, 2008.

The FAST for Symbology network is in production in parallel to the FAST network. Testing is also available at night upon request. All the Data Recipients should convert to the FAST for Symbology network by November 14, 2008. The deadline for the termination of the FAST network cannot be extended due to the capacity degradation associated with running two networks.

The OPRA symbology implementation schedule for 2009 will be revised to reflect schedule changes at OCC. A separate notice will be generated.

Very truly yours,

Joe Corrigan
Executive Director
