September 3, 2009

Dear OPRA Market Data Recipients:

In order to better utilize the bandwidth of the 24 line network at the opening and throughout the day, SIAC will revise the traffic distribution for the OPRA network. The change will be effective at the start of day October 5, 2009. I have attached the revised traffic distribution. The traffic distribution table shows the 5 character security symbol present in the new options symbology in 2010.

Testing of the new distribution will be available, on request, on the standard Tuesday, Thursday schedule at SIAC. To schedule testing, please generate an email request to cqs-cts-opra@siac.com, or contact William Gutierrez at 212-383-4908.

Very truly yours,

Joe Corrigan
Executive Director
