December 16, 2008

Dear OPRA Market Data Recipients:

On December 9, 2008, I notified you that OPRA was making three changes to SIAC output at the start of day January 6, 2009. Because not all data recipients will be in a position to process all three changes on that date, two of the changes will be implemented at the start of day March 9, 2009. The new schedule is:

1. Packet size increased to 1000 bytes – March 9, 2009
2. Sequence number rollover after 1, 999,999,999 – March 9, 2009
3. Expiration date field populated by actual dates (1-31) for most exchanges and zeroes for others - no change in January 6, 2009 date

The original December 9, 2008 data recipient notice is on the OPRA web site at www.opradata.com under Specifications.

Very truly yours,

Joe Corrigan
Executive Director
