April 6, 2006

Dear OPRA Market Data Recipients:

OPRA currently supports two production networks for equity & index option service - an 8 line network and a 24 line network. The 8 line network will terminate on April 21, 2006. The 24 line network will be the only network for equity & index options service on April 24, 2006. There will still be a separate Foreign Currency Options (FCO) service.

As previously announced (February 16, 2006), the potential traffic rate from SIAC will increase to 190,000 MPS on May 16, 2006. This requires bandwidth of 108.3 Mega bits per second (Mbps). If you don't have capacity to process this level of traffic, your service may have to be upgraded.

Very truly yours,

Joe Corrigan
Executive Director
