July 24, 2008

Dear OPRA Market Data Recipients:

In order to better utilize the bandwidth of the 24 line network at the opening and throughout the day, SIAC will revise the traffic distribution for the OPRA network. Based on a review of the traffic in June & July, the revised traffic distribution will reduce the 1 second line peak by 35%. The change will be effective at the start of day August 25, 2008. I have attached the revised traffic distribution.

Testing of the new distribution will be available, on request, on the standard Tuesday, Thursday schedule at SIAC. Contact Joe Loughran at 212-383-4908 to request testing.

Very truly yours,

Joe Corrigan
Executive Director
