Dear OPRA Market Data Recipients:

The OPRA participants have updated their traffic projections for 2007 and made initial projections for 2008. The original capacity increase scheduled for July 2007 has been rescheduled to March 13, 2007. The projections are based on the business plans of the individual Exchanges. These plans are confidential and cannot be discussed. While the results of the penny pilot have not been determined, the projections take into account a penny pilot.

OPRA will increase the potential traffic rate from SIAC at the opening on the indicated date. The bandwidth required to receive data via your SFTI connection is also shown. Two redundant streams of data are available from SIAC. These projections are for one stream.

	Required Capacity Messages Per Second (MPS)	Bandwidth Megabits Per Second (Mbps)	Bandwidth Plus 10% For Retransmissions	Total Messages Per Day
