January 19, 2011

Dear OPRA Market Data Recipients:

The OPRA participants have updated their traffic projections for 2011 & 2012. These MPS projections are based on a 1 second interval. The use of a 1 second interval will better reflect system utilization during bursts of traffic, but results in a larger projection.

OPRA will increase the potential traffic rate from SIAC at the opening on the indicated date. The bandwidth required to receive data via your SFTI connection is reflected in Gigabits per second.

Two redundant streams of data are available from SIAC. These projections are for one stream.

	Required Capacity Messages Per Second (MPS)	Bandwidth Gigabits Per Second (Gbps)	Bandwidth Plus 10% For Retransmissions	Total Messages Per Day
7/7/11	5,257,000	1.27	1.39	17.3 Billion
1/5/12	5,862,000	1.41	1.55	19.8 Billion
7/10/12	6,537,000	1.57	1.73	23.0 Billion

Very truly yours,

Joe Corrigan
Executive Director
